In the Matter of)
)
Amendment of 73.202 (b)) MB Docket No. _____
Table of Allotments)
FM Broadcast Stations)
(Fredericksburg, TX)

To: John Karousos, Assistant Chief
Audio Division of the
Media Bureau

PETITION FOR RULE MAKING

Pursuant to 47 C.F.R. 1.401, Katherine Pyeatt
respectfully petitions the FCC to institute a Rule Making
proceeding to amend the FM Table of Allotments to add
Channel 256C3 at Fredericksburg, Texas.

DISCUSSION

Petitioner respectfully submits that the public
interest would be served by allocating Channel 256C3 to
Fredericksburg, Texas as that community's first competing
FM service. Fredericksburg, Texas is an incorporated
community with a population of 8,911 people.¹
Fredericksburg has its own mayor, its own post office, its
own independent school system, fire department, city

¹Texas Almanac 2002/2003

offices and a number of local churches. 910 businesses in Fredericksburg have been given a credit rating by Dun and Bradstreet as of the last quarter of 2000.² Fredericksburg is a community that is certainly deserving of a local radio station. "Local radio stations play an important role in their communities, providing local news, information and entertainment to residents, and generally serving as good corporate citizens in the local community life. This is particularly true in smaller towns, where the radio stations are limited in number. Yet there are still rural areas of our country that do not have even a local radio station."³ The proposed Channel 256C3 will provide additional diversity and an outlet for local self-expression to Fredericksburg residents and therefore is in the public interest.

Attached hereto is a channel study confirming that Channel 256C3 can be allocated to Fredericksburg, Texas, consistent with the FCC's FM separation rules. See revision of FM Assignment Policies and Procedures, 90 FCC 2d 88 (1992). (See, Attachment A) Note: the petition to add Channel 256A at Harper, Texas was returned by FCC letter dated March 27, 2003. (See, Attachment B)

²Texas Almanac 2002/2003

³ Statement of Commissioner Kevin J. Martin, MM & O, MM docket 99-240, released May 20, 2004.

This action is pending an Application for Review, however, this is an effective but not yet final dismissal. Also note, the petition to add Channel 256A to Ingram, Texas was dismissed by Report & Order, DA 03-1533, MB Docket No. 00-148, released May 8, 2003. (See, Attachment C) This is also an effective but not yet final dismissal.

Additionally, please note that Station KAYG Channel 256A at Camp Wood, Texas was ordered to Channel 251C3 per Report & Order, DA 00-1001, MM Docket No. 99-214, released May 12, 2000. (See, Attachment D) And finally, note that Station KHHL, Channel 255C2 at Leander, Texas, license to cover was granted November 10, 2004. (See, Attachment E)

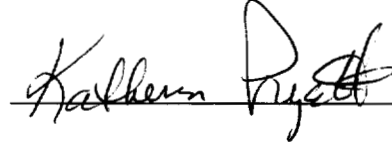

Reference coordinates for Channel 256C3 at Fredericksburg, Texas are:

30 13 21 N
99 02 15 W

Should this petition be granted and Channel 256C3 is allotted to Fredericksburg, Texas, Petitioner will apply for Channel 256C3 at Fredericksburg and after it is authorized, will promptly construct the new facility.

The factual information provided in this Petition for Rule Making is correct and true to the best of my knowledge.

Respectfully submitted,

A handwritten signature in cursive script, appearing to read "Katherine Pyeatt", written over a horizontal line.

Attachment B

(FCC letter returning Petition to add Channel 256A at
Harper, Texas)

Federal Communications Commission
Washington, D.C. 20554

March 27, 2003

Charles Crawford
4553 Bordeaux Avenue
Dallas, Texas 75205

Re: Petition for Rule Making
Harper, Texas - Channel 256A

Dear Mr. Crawford:

This is in response to the Petition for Rule Making that you filed requesting the allotment of Channel 256A at Harper, Texas.

Your request for the allotment of Channel 256A at Harper, Texas, is unacceptable. Our engineering analysis indicates that the allotment of Channel 256A at Harper would be short-spaced to a prior-filed counterproposal in MM Docket No. 00-148. At the time that your petition was filed, a counterproposal was pending in Docket No. 00-148 to allot Channel 256A at Ingram, Texas. Because your petition was filed subsequent to that counterproposal, your petition must be dismissed for failure to comply with the requirements set forth in Section 73.208(a) of the Commission's rules. 47 C.F.R. § 73.208(a).

Based on the above, we are returning your proposal for Harper, Texas. You may resubmit the petition, provided that you make a showing that a fully-spaced transmitter site is available that provides city grade coverage to the entire community.

Sincerely,

A handwritten signature in black ink, appearing to read "John A. Karousos".

John A. Karousos
Assistant Chief, Audio Division
Media Bureau

REPORT AND ORDER
(Proceeding Terminated)

Adopted: May 7, 2003

Released: May 8, 2003

By the Chief, Audio Division:

1. The Audio Division has before it a *Notice of Proposed Rule Making* in the captioned proceeding.¹ Nation Wide Radio Stations filed Comments and Reply Comments. First Broadcasting Company, L.P., Rawhide Radio, L.L.C., Next Media Licensing, Inc., Capstar TX Limited Partnership and Clear Channel Broadcast Licenses, Inc. ("Joint Parties") filed a Counterproposal and Reply Comments. Fritz Broadcasting Co., Inc. and M&M Broadcasters, Ltd. filed Joint Reply Comments. Elgin FM Limited Partnership and Charles Crawford ("Elgin-Crawford") jointly filed Reply Comments and Maurice Salsa filed Reply Comments.² For the reasons discussed below, we are dismissing both the initial proposal for Channel 233C3 at Quanah, Texas, and the Counterproposal.

Background

2. At the request of Nation Wide Radio Stations, the *Notice* in this proceeding proposed the allotment of Channel 233C3 to Quanah, Texas.³ In response to the *Notice*, the Joint Parties filed a Counterproposal involving twenty-two communities in Texas and Oklahoma. In one aspect of this Counterproposal, the Joint Parties propose the substitution of Channel 248C for Channel 248C2 at Durant, Oklahoma, reallocation of Channel 248C to Keller, Texas, and modification of the Station KLAK license to specify operation on Channel 248C at Keller, Texas. In order to accommodate this allotment, the Joint Parties propose three channel substitutions. Included among those substitutions was the

¹ 15 FCC Rcd 15809 (MM Bur. 2000).

² In this proceeding, Texas Grace Communications, Elgin FM Limited Partnership, Charles Crawford, Maurice Salsa, M&M Broadcasters, AM&FM Broadcasters and the Joint Parties have filed additional pleadings. In view of our action dismissing the Joint Parties Counterproposal, it will not be necessary to discuss these pleadings in the context of this *Report and Order* terminating this proceeding.

³ Nation Wide Radio Stations has withdrawn its expression of interest in this allotment. In accordance with Section 1.420(j) of the Rules, Nationwide Radio Stations states that neither it nor any of its principals have been paid or promised any consideration for the withdrawal of its expression of interest in the Quanah allotment.

substitution of Channel 230C1 for Channel 248C1 at Archer City, Texas, and the modification of the Station KRZB permit to specify operation on Channel 230C1. On the basis of our own engineering review, Joint Reply Comments filed by Fritz Broadcasting Co., Inc. and M&M Broadcasters, Ltd., and Reply Comments filed by Maurice Salsa, the proposed transmitter site (33-36-58 and 98-51-42) for the Channel 230C1 allotment at Archer City is short-spaced to a prior-filed application filed by AM & FM Broadcasters, LLC, licensee of Station KICM, Channel 229C2, Krum, Texas, to upgrade to Channel 229C1 (File No. BMPH-20000725AAZ) (the "KICM Class C1 Application").

3. Counterproposals that are in conflict with a previously filed application can be considered if the counterproposal is amended to remove the conflict within 15 days from the date the counterproposal appears on public notice.⁴ The Note also requires a counterproponent to show that it could not have known by exercising due diligence of the pending conflicting FM application. The Joint Parties and AM & FM Broadcasters submitted Reply Comments addressing this issue. Under the agreement, AM & FM Broadcasters agrees to file an application to downgrade Station KICM to Channel 229C2 in the event its application is granted and the Counterproposal is adopted. Pursuant to the agreement, the Joint Parties would "compensate" AM & FM Broadcasters for the downgrade of Station KICM. On August 20, 2001, the staff granted the KICM Class C1 Application.

Discussion

4. We dismiss the Counterproposal because the proposed Archer City Channel 230C1 allotment is short-spaced to the KICM Class C1 construction permit. The Joint Parties have not shown that they could not have known about the then-conflicting KICM Application. Nor have the Joint Parties sought to amend their Counterproposal to protect the proposed Archer City Channel 230C1 allotment.

5. The Commission does not entertain a short-spaced allotment that is contingent on the grant of another application.⁵ This is precisely what the Joint Parties seek. The Archer City allotment is short-spaced to the KICM construction permit and contingent on the staff granting future applications by AM & FM Broadcasters for both a Class C2 construction permit and license. We reject Joint Parties argument that its downgrade proposal complies with the contingent application procedures set forth in Section 73.3517(e) of the Commission's Rules. Section 73.3517(e) permits the simultaneous acceptance of contingent *minor change applications*. It does not authorize the filing of contingent rulemaking petitions. Accordingly, the Counterproposal must be dismissed.

Alternative Proposals

6. The Joint Parties filed an alternative twelve-allotment proposal in anticipation of a staff determination that the Channel 230C1 Archer City allotment is impermissibly short-spaced to the KICM permit. We reject this alternative. A counterproposal must conflict with the proposal set forth in the *Notice*.⁶ In this instance, none of these proposals conflict with Nation Wide Radio Station's initial proposal for a Channel 233C3 allotment at Quanah. As such, we will not bifurcate the Counterproposal or otherwise consider any of these proposals in the context of this proceeding.⁷

⁴ See Note to Section 73.208 of the Rules; see also *Conflicts Between Applications and Petitions for Rule Making to Amend the FM Table of Allotments*, 8 FCC Rcd 4743 (1993).

⁵ See *Oxford and New Albany, Mississippi*, 3 FCC Rcd 615 (MM Bur. 1988), *recon.* 3 FCC Rcd 6626 (MM Bur. 1988); see also *Cut and Shoot, Texas*, 11 FCC Rcd 16383 (MM Bur. 1996).

⁶ See *Implementation of BC Docket No. 80-90 to Increase the Availability of FM Broadcast Assignments*, 5 FCC Rcd 931, n. 5 (1990).

⁷ See also *Broken Arrow and Bixby, Oklahoma, Coffeyville, Kansas*, 3 FCC Rcd 6507 (MM Bur. 1988).

7. In the event that its Counterproposal can not be favorably entertained, the Joint Parties advance two alternative proposals. The staff no longer entertains alternative proposals set forth in counterproposals.⁸ In any event, each of these alternatives fails to comply with our rules and procedures. The first proposal involves the proposal to reallocate Channel 248C to Keller, Texas, and modify the Station KLAJ license to specify operation on Channel 248C at Keller. A Channel 248C allotment at Keller requires the substitution of Channel 230C1 at Archer City, and thus, cannot be considered. The second alternative only proposes the substitution of Channel 247C1 for Channel 248C at Waco, Texas, reallocation of Channel 247C1 to Lakeway, Texas, and modification of the Station KWTX license to specify operation on Channel 247C1 at Lakeway. The Joint Parties also proposed related channel substitutions necessary to accommodate this reallocation. However, none of these proposed channel substitutions conflict with the underlying Channel 233C3 allotment at Quanah, Texas, proposed in the *Notice*.

8. Accordingly, IT IS ORDERED, That the aforementioned proposal filed by Nation Wide Radio Stations for a Channel 233C3 allotment at Quanah, Texas, IS DISMISSED.

9. IT IS FURTHER ORDERED, That the aforementioned Counterproposal filed by the Joint Parties IS DISMISSED.

10. IT IS FURTHER ORDERED, That this proceeding IS TERMINATED.

11. For further information concerning this proceeding, contact Robert Hayne, Media Bureau, (202) 418-2177.

RM-9699

REPORT AND ORDER
(Proceeding Terminated)

Adopted: April 19, 2000

Released: May 12, 2000

By the Chief, Allocations Branch:

1. In response to a Petition for Rule Making filed by La Radio Cristiana Network, Inc. ("La Radio"), the Commission has before it for consideration the Notice of Proposed Rule Making, 14 FCC Rcd 9057 (1999), requesting the substitution of Channel 251C3 for Channel 256A at Camp Wood, Texas. La Radio filed supporting comments. Frank McCoy ("McCoy") filed a counterproposal.² Reply comments were filed by La Radio and McCoy.

2. As stated in the Notice, La Radio proposed the substitution of Channel 251C3 for Channel 256A at Camp Wood, Texas, and modification of the construction permit for Station KAYG to specify operation on Channel 251C3. The Notice further stated that Channel 251C3 could be allotted to Camp Wood at La Radio's specified site without conflicting with any current allotments or proposals. It was pointed out, however, that in accordance with Section 1.420(g) of the Commission's Rules, should another party indicate an interest in the Class C3 allotment, the modification could not be implemented unless an equivalent class channel could also be allotted to Camp Wood.

3. McCoy submitted a counterproposal requesting the allotment of Channel 251C2 at Rocksprings, Texas. McCoy argues that his counterproposal is superior to the proposal advanced in the Notice as it will bring a first local transmission service to Rocksprings and will provide a new service to an underserved population nearly three times greater than the underserved population which would receive new service by the proposed allotment at Camp Wood. McCoy states that Rocksprings is an incorporated community with a population of 1,339 people according to the 1990 U.S. Census, is the county seat of Edwards County, has a local airport, motels, and restaurants, and qualifies as a community for allotment purposes. McCoy points out that Rocksprings has neither an AM nor an FM

¹ The community of Rock Springs, Texas, has been added to the caption.

² The counterproposal filed by McCoy was put on public notice on August 11, 1999, Report No. 2350 (RM-9699).

station licensed to it and that the new service would provide service to 4,422 people in underserved areas, 1,342 people currently receiving three aural services, 2,869 people currently receiving four aural services and 211 people that currently receive only two aural services. In contrast, according to McCoy, Channel 251C3 at Camp Wood will add new service to an underserved population of only 1,526 people (636 of whom currently receive three aural services, 890 of whom receive four aural services). McCoy states that Channel 251C2 can be allotted to Rocksprings in compliance with the Commission's spacing requirements and that he will file an application for Channel 251C2 at Rocksprings.

4. Conflicting proposals, such as have been filed in this proceeding, are generally considered under the guidelines set forth in Revision of FM Assignment and Policies and Procedures, 90 FCC Rcd 2d (1982).³ However, in this instance, since an additional channel is available, there is no need to compare the two communities. Therefore, after consideration of the information filed in this proceeding, we believe the public interest would be served by the allotment of FM channels at Camp Wood and Rocksprings, Texas, providing expanded service at Camp Wood and a first local service at Rocksprings.⁴ Channel 251C3 can be allotted to Camp Wood, Texas, in compliance with the Commission's spacing requirements at La Radio's specified site.⁵ Channel 295C2 can be allotted to Rocksprings, Texas, in compliance with the spacing requirements with a site restriction 10.8 kilometers west of the community.⁶ Since the communities of Camp Wood and Rocksprings are located within 320 kilometers of the U.S.-Mexican border, concurrence of the Mexican Government has been obtained for both allotments.⁷

5. Accordingly, pursuant to the authority contained in Sections 4(i), 5(c)(1), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, and Sections 0.61, 0.204(b) and 0.283 of the Commission's Rules, IT IS ORDERED, That effective June 26, 2000, the FM Table of Allotments,

Section 73.202(b) of the Commission's Rules, IS AMENDED for the communities listed below, as

³ The priorities are (1) first full-time aural service; (2) second full-time aural service; (3) first local service; and (4) other public interest matters. [Co-equal weight given to priorities (2) and (3).]

⁴ In MM Docket No. 99-336, Rocksprings Radio Broadcasting Company has proposed the allotment of Channel 223A at Rocksprings. See 14 FCC Rcd 19474 (1999).

⁵ The coordinates for Channel 251C3 at Camp Wood are 29-42-53 and 100-00-56.

⁶ The coordinates for Channel 295C2 at Rocksprings are 30-02-44 and 100-19-00.

⁷ Mexican concurrence has been received for Channel 251C3 at Camp Wood. Although concurrence has been requested for Channel 295C2 at Rocksprings, notification has not been received. Therefore, operation with the facilities specified for Rocksprings herein is subject to modification, suspension, or termination without right to hearing, if found by the Commission to be necessary in order to conform to the 1992 USA-Mexico FM Broadcast Agreement or if specifically objected to by Mexico.

follows:

Community	Channel Number
Camp Wood, Texas	251C3
Rocksprings, Texas	295C2

6. IT IS FURTHER ORDERED, That pursuant to Section 316(a) of the Communications Act of 1934, as amended, the construction permit of La Radio Cristiana Network, Inc. for Station KAYG, Camp Wood, Texas, IS MODIFIED to specify operation on channel 251C3 in lieu of channel 256A, subject to the following conditions:

- (a) Within 90 days of the effective date of this Order, the permittee shall submit to the Commission a minor change application for a construction permit (Form 301), specifying the new facility;
- (b) Upon grant of the construction permit, program tests may be conducted in accordance with Section 73.1620; and
- (c) Nothing contained herein shall be construed to authorize a change in transmitter location or to avoid the necessity of filing an environmental assessment pursuant to Section 1.1307 of the Commission's Rules.

7. A filing window for Channel 295C2 at Rocksprings, Texas, will not be opened at this time. Instead, the issue of opening a filing window for this channel will be addressed by the Commission in a subsequent order.

8. Pursuant to Commission Rule Section 1.1104(3)(1), any party seeking a change in community of license of an FM or television allotment or an upgrade of an existing FM allotment, if the request is granted, must submit a rule making fee when filing its application to implement the change in community of license and/or upgrade. As a result of this proceeding, La Radio Cristiana Network, Inc., permittee of Station KAYG, is required to submit a rule making fee in addition to the fee required for the applications to effectuate the upgrade at Camp Wood, Texas.

9. IT IS FURTHER ORDERED, That this proceeding IS TERMINATED.

10. For further information concerning this proceeding, contact Kathleen Scheuerle, Mass Media Bureau, (202) 418-2180. Questions related to the application filing process for Channel 251C3, Camp Wood and Channel 295C2, Rocksprings, should be addressed to the Audio Services Division, Mass Media Bureau, (202) 418-2700.

Effective radiated power in the Horizontal Plane (kW):	25.0	25.0
Height of radiation center above ground (Meters):	72	72
Height of radiation center above mean sea level (Meters):	401	401
Height of radiation center above average terrain (Meters):	164	164

Antenna structure registration number: 1243735

Overall height of antenna structure above ground (including obstruction lighting if any) see the registration for this antenna structure.

Special operating conditions or restrictions:

- 1 The permittee/licensee must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
- 2 ***** This is a Section 73.215 contour protection grant *****
***** as requested by this applicant *****

Callsign: KHHL

License No.: BLH-20040719ADW

Special operating conditions or restrictions:

- 3 The licensee has demonstrated compliance with the FCC radiofrequency electromagnetic field exposure guidelines based upon the usage of the antenna specified herein. If the licensee makes any changes in facilities via modification of license application in accordance with 47 CFR section 73.1690(c), the subsequent Form 302-FM, application for license, must include a revised RF field showing to demonstrate continued compliance with the FCC guidelines.
